

# LIST OF POSTERS

## SESSION 1, MONDAY, JUNE 27, 2016, 16:45–18:45

### POSTERS No. 1-67

1. Poly(POSS-MA)s – synthesis and characterization; *Adrian Franczyk, Kinga Stefanowska, Krzysztof Matyjaszewski, Bogdan Marciniak*
2. Influence of nanobent on properties of polyurethane/chitosan composites ; *Joanna Brzeska, Magda Morawska, Aleksandra Heimowska, Wanda Sikorska, Marek Kowalczuk, Maria Rutkowska*
3. Synthesis of well-defined functional molecular and macromolecular double-decker shaped silsesquioxanes ; *M. Walczak, R. Januszewski, B. Dudziec, M. Majchrzak, B. Marciniak*
4. Hydrosilylation of ethynylsiloxysubstituted silsesquioxanes as a method for stereoselective synthesis of POSS-alkenyl systems; *D. Brzqkalski, B. Dudziec, B. Marciniak*
5. Preparation and properties characterization of polyurethane foams modified with oxamide and borate groups; *Agnieszka Szyszkowska, Iwona Zarzyka*
6. Synthesis and spectral characterization of polyurethane with imidazoquinazoline ring; *Agnieszka Szyszkowska, Iwona Zarzyka*
7. Super-macroporous cryogels from dextran prepared via UV-irradiation; *Georgi L. Georgiev, Petar Petrov*
8. Biocompatibility evaluation of the new elastomers using intracutaneous irritation and sensitization tests; *B. Zawidlak-Węgrzyńska, M. Gonsior, M. Gawlikowski, P. Ciesła, R. Kustosz, P. Ścigała, M. El Fray, A. Piegat*
9. Air drying, high gloss decorative paints, formulated with bio-based polymers as binders; *M. Moreno, M.J. Barandiaran, H. Kuczyńska, A. Ślusarczyk*
10. New aspects of condensation between ketoesters and phenol catalyzed by ionic liquids; *E. Dresler, R. Jasiński, E. Nowakowska-Bogdan, D. Wieczorek*
11. N,O-acylated chitosan derivatives – structure and properties; *Agata Niemczyk, Agnieszka Piegat, Mirosława El Fray*
12. High cis-1,4-polybutadiene modified with polyhedral oligomeric silsesquioxanes; *Rafał Januszewski, Marcin Walczak, Ireneusz Kownacki, Bogdan Marciniak*
13. Determination of arrhenius coefficients of N-vinylpyrrolidone polymerization in aqueous solution by pulsed electron polymerization – size exclusion chromatography (PEP-SEC); *Piotr Sawicki, Agata Bauer, Sławomir Kadłubowski, Piotr Ulański*
14. Characterization of thermal insulation materials based on polyurethane foams and aerogel; *Ewa Wierzbička, Izabella Legocka*
15. Thermal, optical and photoinduced properties of new azopolyimides and their supramolecular counterparts; *J. Konieczkowska, A. Kozanecka-Szmigiel, E. Schab-Balcerzak*
16. Polyurethane foams with 1,3,5-triazine ring based on melamine-formaldehyde-butanone resins; *Anna Ryczek, Dorota Głowacz-Czerwonka*
17. Hyperbranched polymers of 3,5-diaminobenzoic acid and 4,4'-diaminodiphenylmethane as a modifier of polyoxymethylene; *Anna Ryczek, Justyna Czech-Polak, Beata Mossety-Leszczak, Henryk Galina, Maciej Heneczowski*
18. New cyclophosphasene derivatives as flame retardant crosslinkers for silicone rubbers; *Michał Dutkiewicz, Rafał Jauszewski, Bogdan Marciniak*
19. Ultra-light silica aerogel by ambient pressure drying; *Katarzyna Suwała, Maria Zielecka, Magdalena Wenda, Marek Panasiuk, Elżbieta Bujnowska*
20. New polymeric cryoprotectants ; *Mateusz Zajęc, Kamil Kamiński, Krzysztof Szczubiałka, Maria Nowakowska*
21. Thermodynamic properties of silyl terminated binder; *Ewa Langer, Grażyna Kamińska-Bach, Katarzyna Suchoń*
22. Cool roofs – ecological and economical solution for roofing of agricultural buildings; *Krzysztof Bortel, Ewa Langer, Helena Kuczyńska, Wacław Romaniuk, Marcin Majchrzak, Kinga Borek, Kamila Mazur, Witold Wardal*
23. Products of transesterification of vegetable oils as new plasticizers for poly(vinyl chloride); *Ewa Langer, Sylwia Waskiewicz, Krzysztof Bortel, Marta Lenartowicz-Kliik*
24. Research on modification of nanofibrillated cellulose (NFC) with flame retardant compounds and its potential application; *Agnieszka Leszczyńska, Katarzyna Haraźna, Krzysztof Pielichowski*
25. Synthesis and investigation of copolymers of glycerol carbonate and phthalimide derivatives capable of carbon dioxide capture; *Aleksandra Świderska, Mariusz Tryznowski, Paweł Parzuchowski*
26. Synthesis and properties of low-viscosity epoxy resin; *Maciej Kisiel, Henryk Galina, Beata Mossety-Leszczak*
27. Low-molecular-weight poly(phenylene oxide) – polymer modifier; *Angelika Kruzel, Zbigniew Wielgosz, Regina Jeziorska, Dariusz Jamanek*
28. Synthesis of sequence-defined oligophenylacetylenes using tailored polystyrene soluble support; *Róża Szweda, Paul N. W. Baxter, Jean-François Lutz*
29. Kinetic study on the thermal conversion of poly(hydroxy imide)s to poly(benzoxazole)s; *M. Wójtowicz, H. Janeczek, A. Wolińska-Grabczyk*
30. Preparation and characterization of new start-shaped polyether-pentols from glycidyl ethers; *Kinga Skrzeczyna, Zbigniew Grobelny, Andrzej Swinarew, Justyna Jurek-Suliąa, Jadwiga Gabor, Marta Łęźniak*
31. On the chain transfer reactions in the anionic polymerization of oxiranes; *Kinga Skrzeczyna, Zbigniew Grobelny, Andrzej Swinarew, Justyna Jurek-Suliąa, Jadwiga Gabor, Marta Łęźniak*
32. Effect of addition of sepiolite in biodegradable biopolyesters; *Jennifer González-Ausejo, José María Lagarón, Rafael Balart, José Gámez-Pérez, Luis Cabedo*
33. Polylactide fibers modified with feluric acid; *Dorota Wojciechowska, Dawid Stawski, Fran Simon, Lucyna Herczyńska*
34. Synthesis and structural studies of potentially bioactive PHA and γ-PGA oligomers; *Iwona Kwiecień, Iza Radecka, Michał Kwiecień, Marek Kowalczuk, Grażyna Adamus*
35. Chiral recognition – a new tool to control the stereoselectivity of metal alkoxides in the ring-opening polymerization of *rac*-LA; *Martyna Cybularczyk, Anna Litwińska, Anna Maria Dąbrowska, Paweł Horeglad*
36. Dialkylgallium alkoxides – catalysts for the controlled and stereoselective polymerization of *rac*-LA; *Paweł Horeglad*
37. Detailed structure characterization of functional block and star copolymers designed for biomedical application; *L. Todorova, S. Ivanova, D. Christova, I. Kwiecień, J. Rydz, W. Sikorska*
38. Prediction studies of cosmetics packages from aliphatic-aromatic copolyester and polylactide commercial blends; *Wanda Sikorska, Katarzyna Wolna-Stypka, Grażyna Adamus, Joanna Rydz, Marta Musiol, Henryk Janeczek, Marek Kowalczuk*
39. The properties of the enzymatically treated dissolving cellulose pulps; *Rom Monika, Janicki Jaroslaw, Czeslaw Slusarczyk, Janusz Fabia, Marta Sieradzka, Siika-aho Matti, Marjamaa Kaisa, Kristina Kruus, Langfelder Kim, Steel Crystal, Paloheimo Marja, Puranen Terhi, Mäkinen Susanna, Wawro Dariusz*
40. Biocatalysed synthesis of potato starch oleates in ionic liquid as an ecofriendly method to produce a biodegradable films; *Arkadiusz Zarski, Krzysztof Bajer, Janusz Kapusniak*
41. Shape memory blends obtained from L-lactide/glycolide copolymer and aliphatic oligoesters; *Anna Smola-Dmochowska, Piotr Dobrzyński, Natalia Śmigiel-Gac, Michał Sobota, Bożena Kaczmarczyk, Janusz Kasperczyk*
42. Structural studies of bioactive (co)oligoesters with antioxidant properties by electrospray ionization tandem mass spectrometry; *Magdalena Maksymiak, Tomasz Bałakier, Janusz Jurczak, Marek Kowalczuk, Grażyna Adamus*
43. Biodegradable L-lactide/succinate butylene/citrate butylene copolyesters, synthesis and properties; *Natalia Śmigiel-Gac, Anna Smola-Dmochowska, Piotr Dobrzyński*
44. The fine modification of poly-(R)-3-hydroxybutyrate by combined method of extrusion; *S. Jurczyk, J. Włodarczyk, M. Sobota, P. Kurcok*
45. Hyperbranched polyesters with aliphatic or mesogenic core; *Małgorzata Walczak, Izabela Czarniecka, Piotr Szałański, Anna Ryczek, Justyna Sekuła, Beata Mossety-Leszczak, Henryk Galina*
46. Polycondensation of the macromonomers derived from polyhydroxyalkanoates; *P. Chaber, M. Kwiecień, G. Adamus*
47. Biocomposites of chitosan and ionic liquid modified nanocellulose; *Aleksandra Grzqbka-Zasadzińska, Sławomir Borysiak*
48. Hybrid polymers based on renewable raw materials for adhesive and sealants; *Krzysztof Jaskot*
49. King Midas approach – Turning plastic waste into value added bioplastics; *Brian Johnston, David Hill, Marek Kowalczuk, Guozhan Jiang, Iza K. Radecka*
50. Possibilities of creating a half-product for thermoplastic processing with the use of chemical and biochemical modification of cereal product; *Michał Janiga, Justyna Wietecha, Jadwiga Stufka-Olczyk, Janusz Kazimierczak, Anna Milczarek, Danuta Ciechańska*
51. The evaluation of the modified biopolymer raw material usability for making functional adhesives in paper manufacturing; *T. Mik, D. Ciechańska, M. Seremak, D. Dębiec*
52. Heterodimeric zinc complexes: synthesis, characterization and application in ROP of lactides; *Dawid Jędrzkiewicz, Jolanta Ejfler*
53. Mesoporous carbon materials obtained from polymer coated magnetic nanoparticles as a potential sorbents for NSAIDs; *Dorota Chełminiak, Marta Ziegler-Borowska, Anna Ilnicka, Halina Kaczmarek, Jerzy P. Łukaszewicz, Katarzyna Węgrzynowska-Drzymalska, Anna Kaczmarek-Kędziera*
54. Synthesis and characterization of the magnetite nanoparticles coated with modified chitosan rich of long-distanced amino groups for lipase immobilization; *Dorota Chełminiak, Marta Ziegler-Borowska, Tomasz Siódmiak, Adam Sikora, Halina Kaczmarek, Anna Kaczmarek-Kędziera, Michał P. Marszałł*
55. Silica-supported Au@hollow-SiO2 particles prepared via block copolymer template approach as efficient nanocatalyst; *Andriy Horechyy, Aruni Shajkumar, Bhanu Nandan, Sunita Sanwaria, Victoria Albrecht, Marcin Libera, Myong-Hoon Lee, Gudrun Auffermann, and Manfred Stamm*
56. Effect of chain transfer agent (CTA) on microstructure of ethylene/1-octene copolymers; *J. Herud, M. Białek*
57. Vanadium and titanium complexes bearing [OSSO]-type bis(phenolate) ligands: synthesis and catalytic properties in ethylene and 1-octene (co)polymerization; *J. Herud, M. Białek, G. Spaleniak, M. Żołnowska*
58. Study of the compositional heterogeneity of ethylene/1-octene copolymers produced by vanadium complexes of diamine-bis(phenolate) ligands; *M. Białek, J. Herud, E. Bisz*
59. Synthesis and olefin polymerization properties of titanium and vanadium complexes bearing Mg-containing silsesquioxane ligands; *M. Pochwała, M. Białek, A. Franczyk, K. Czaja, B. Marciniak*
60. HDPE and PP/siloxane-silsesquioxane resin composites – synthesis and characterization; *Mariusz Szolyga, Arkadiusz Niemczyk, Krystyna Czaja, Michał Dutkiewicz, Bogdan Marciniak*
61. Synthesis, characterization and properties of ethylene/POSS copolymers; *Paweł Groch, Katarzyna Dziubek, Krystyna Czaja, Beata Dudziec, Bogdan Marciniak*
62. Polyethylene and polypropylene nanocomposites filled with sol-gel silica; *Arkadiusz Niemczyk, Katarzyna Dziubek, Krystyna Czaja*
63. Synthesis of functionalized star poly(meth)acrylates with various distributions of *tert*-butyl groups as protecting acidic units; *Justyna Odrobińska, Rafał Bielas, Paulina Maksym, Anna Mielańczyk, Dorota Neugebauer*
64. Trehalose-functionalized thermoresponsive glycomicrogels; *Małgorzata Burek, Ilona Wandzik, Sylwia Waškiewicz, Anna Lalik, Sebastian Student, Tadeusz Bieg*
65. The influence of cavitation phenomenon on selected properties during tensile deformation of polyethylene; *Artur Krajenta, Artur Rozanski*
66. Preparation and characterization of polyolefin waxes; *Justyna Kowalska, Krystyna Czaja*
67. Receive biocidal composites on the matrix of polyethylene; *Dawid Kansy, Kornelia Bosowska, Krystyna Czaja*
